PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years building and modernizing production systems across full-stack web, cloud, and automation. Deep .NET expertise (Framework, Core, .NET 8) combined with broad, hands-on experience in Angular/React, Python, mobile, and multi-cloud (Azure, AWS, GCP). Track record of leading modernization initiatives for government and large-scale organizations — designing secure APIs, building CI/CD pipelines, and shipping real tools, from data-sync engines to trading bots and marketing-automation systems. Comfortable owning projects end-to-end in distributed, remote-first teams.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, Dart, Kotlin, SQL / T-SQL, X++, HTML5, CSS3

Backend & APIs: ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, REST, SOAP, OAuth 2.0 / JWT, data encryption (AES), Microservices, Clean Architecture, Domain-Driven Design

Frontend & Mobile: Angular, React, RxJS, WPF, WinForms, React Native, Flutter, Kotlin (Android)

Cloud & DevOps: Azure (App Services, Functions, Azure SQL, AKS), AWS (S3, Lambda), GCP (Cloud Functions, Pub/Sub), Docker, Kubernetes, CI/CD (Azure DevOps, GitHub Actions), IIS, Linux & Windows server administration

Data & BI: MS SQL Server, Azure SQL, PostgreSQL, MySQL, NoSQL, SSIS / SSRS, ETL & data migration, Power BI

Automation & AI: Python automation scripts & workflows, web scraping / data extraction, trading bots, WhatsApp / marketing automation, LLM & AI tooling integration

Enterprise: Microsoft Dynamics 365 Finance & Operations (X++), legacy system modernization

Practices: Agile / Scrum, TDD, unit testing (xUnit / NUnit), code review, technical documentation, mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Apr 2026 – Present

Saudi Aramco — Dhahran, Saudi Arabia

- Architect and develop enterprise-scale .NET 8 applications supporting critical operations for one of the world's largest energy producers (70,000+ employees across global facilities).
- Lead modernization of legacy systems to cloud-native microservices on Azure Kubernetes Service and API Management, consolidating infrastructure to reduce operational cost and improve scalability.
- Design secure RESTful APIs (OAuth 2.0 / JWT) integrating with SAP ERP, aligned with ISO 27001 and enterprise security standards.
- Build real-time monitoring dashboards with Angular and SignalR, giving leadership actionable insight and faster decision-making.
- Tune high-traffic databases through advanced T-SQL indexing and query optimization, improving query response for performance-critical applications.

Senior Software Engineer

Aug 2025 – Mar 2026

Saudi Irrigation Organization (SIO) — Dammam, Saudi Arabia

- Migrated a legacy .NET Framework 4.6 monolith to a modular ASP.NET MVC + Web API architecture, improving maintainability and enabling Azure cloud deployment.
- Built secure REST integrations with Namaa (Ministry of Environment, Water & Agriculture), meeting national government data and compliance standards.
- Delivered responsive Angular 15+ / TypeScript interfaces, improving data visualization and end-user experience.
- Configured Azure App Services with Azure DevOps CI/CD pipelines for zero-downtime deployments and high availability.

Software Engineer

Jul 2024 – Jul 2025

AOMATA LLC — Lahore, Pakistan

- Built a high-performance .NET data-synchronization engine with AES-256 encryption, improving transfer throughput and securing data in transit.
- Optimized shared .NET Standard libraries alongside mobile (Android / iOS) teams, improving cross-platform performance.
- Contributed full-stack features to SmartTransfer (1M+ downloads), shipping functionality used across the mobile user base.
- Automated build and release with Azure DevOps and GitHub Actions, streamlining deployments and reducing manual release errors.

Software Engineer

Aug 2022 – Jul 2024

AxioneTech — Lahore, Pakistan

- Customized Microsoft Dynamics 365 Finance & Operations (X++ / C#) for Accounts Payable and Inventory workflows, automating manual steps to reduce processing errors.
- Built ASP.NET Core + Angular enterprise applications supporting 1,000+ concurrent users.
- Executed a 500,000+ record migration to Dynamics 365 using SSIS and custom ETL scripts, validating data integrity post-migration.
- Developed 30+ SSRS reports delivering business intelligence for data-driven decision-making.
- Recognized as Employee of the Month for technical contribution and problem-solving.

Associate Software Engineer

May 2021 – Aug 2022

Digital Data Systems — Lahore, Pakistan

- Built full-stack ASP.NET Core + Angular applications serving 500+ daily users.
- Designed RESTful APIs with Entity Framework Core, optimizing database queries to improve response times.
- Contributed to migrating legacy .NET Framework modules to .NET Core for improved scalability and cross-platform support.
- Worked in Agile teams — sprint planning, daily standups, code reviews, and retrospectives.

SELECTED PROJECTS & TECHNICAL PORTFOLIO

Independent projects spanning applied AI, algorithmic trading, and data automation. Full write-ups on GitHub (github.com/Muhammad-TalhaK).

- **FleetConnect — AI Voice Dispatcher** — Python/Flask phone agent that makes and receives calls, holds an AI-driven spoken conversation (OpenAI for turn logic, ElevenLabs TTS, via Twilio), and logs structured outcomes to Google Sheets in real time. github.com/Muhammad-TalhaK/fleetconnect
- **XAUUSD Basket-Trailing EA (MQL5)** — Algorithmic MetaTrader 5 trading bot with trend-based grid entries, basket-level P&L management, a hard basket stop-loss, and a ratcheting “no-giveback” profit-lock trailing system. github.com/Muhammad-TalhaK/mt5-xauusd-basket-ea
- **FMCSA Carrier Data Scraper (C#)** — Resilient .NET scraper that extracts active US trucking carriers from the public FMCSA registry (proxy support, browser headers, rate limiting), filters qualified leads, and exports them to Excel. github.com/Muhammad-TalhaK/fmcsa-carrier-scraper

EDUCATION

Bachelor of Science in Information Technology

2023

University of the Punjab — Lahore, Pakistan

LEADERSHIP & ADDITIONAL

- Mentored and trained junior engineers and interns in clean code, design patterns, and Agile delivery.
- Contributed to technical hiring and candidate evaluation (recruitment / interviewing experience).
- Led modernization initiatives that reduced infrastructure and operational overhead.
